Banana Problem No: 1(Smart Lab Equipment & Slot Reservation Portal)

Kanban Project :

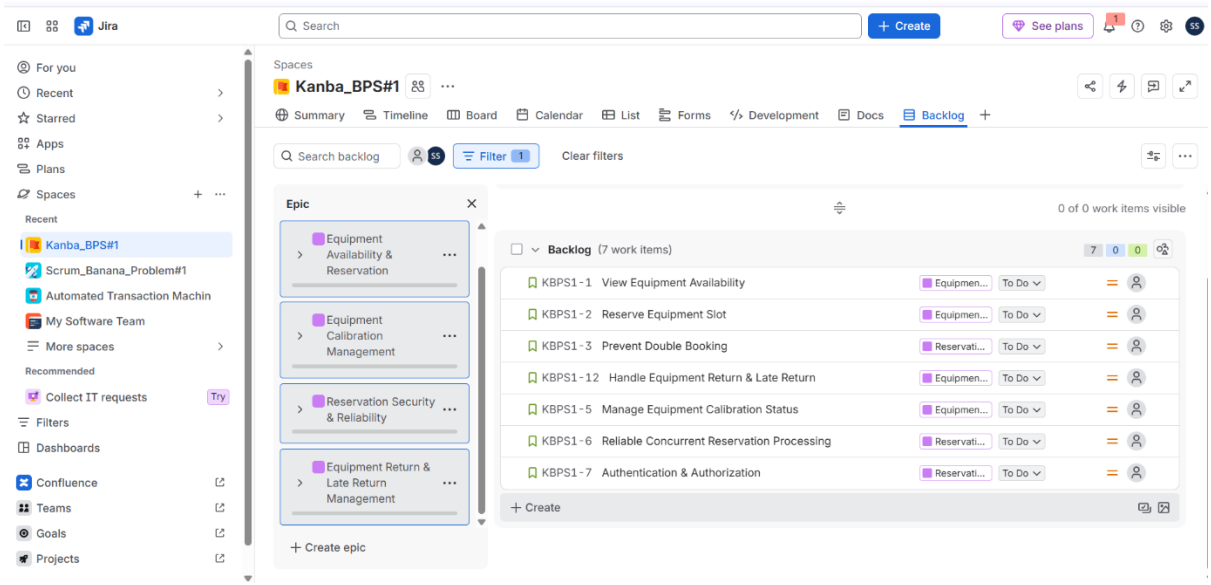

Screenshot 1 – Kanban Backlog

Description:
This screenshot shows the Kanban project backlog for the Smart Lab Equipment & Slot Reservation Portal. The backlog contains the seven requirements created as Stories: View Equipment Availability, Reserve Equipment Slot, Prevent Double Booking, Handle Equipment Return & Late Return, Manage Equipment Calibration Status, Reliable Concurrent Reservation Processing, and Authentication & Authorization.

Screenshot 2 – Epic Creation and Epic Assignment

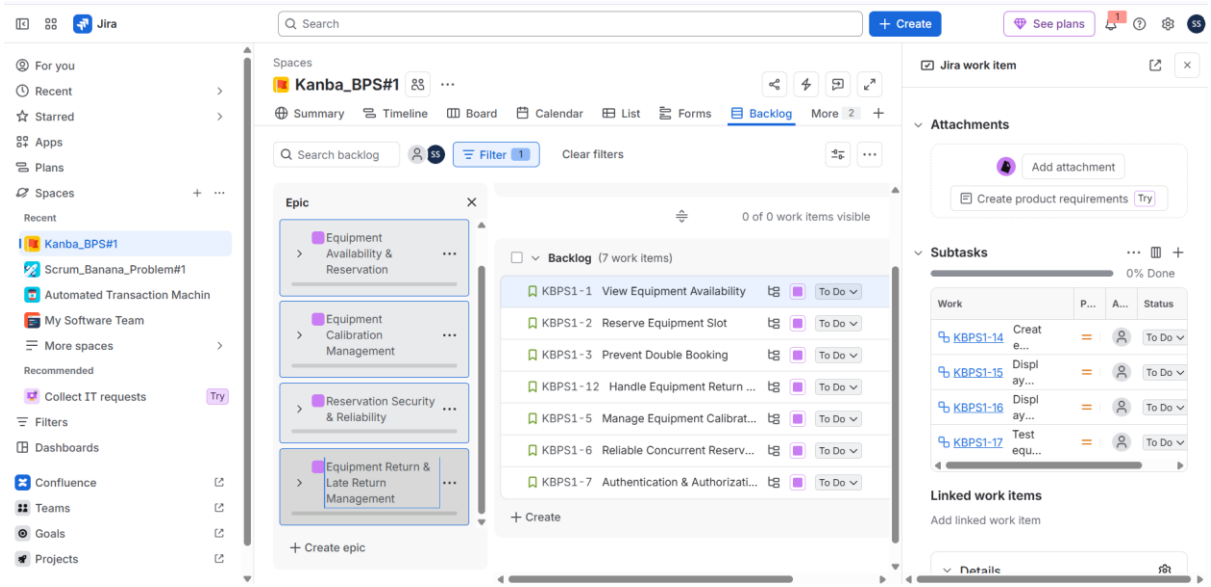

Description:
This screenshot shows the Epics created for the Smart Lab Equipment & Slot Reservation Portal and their assignment to the corresponding Stories in the Kanban backlog. The Epics represent major scenarios of the system, while the Stories represent the individual requirements associated with those scenarios.

Screenshot 3 – Subtasks for a Story

Description:

This screenshot shows the details of a Story in the Kanban project along with its associated Subtasks. The Subtasks divide the work required to implement the selected requirement into smaller and manageable activities.

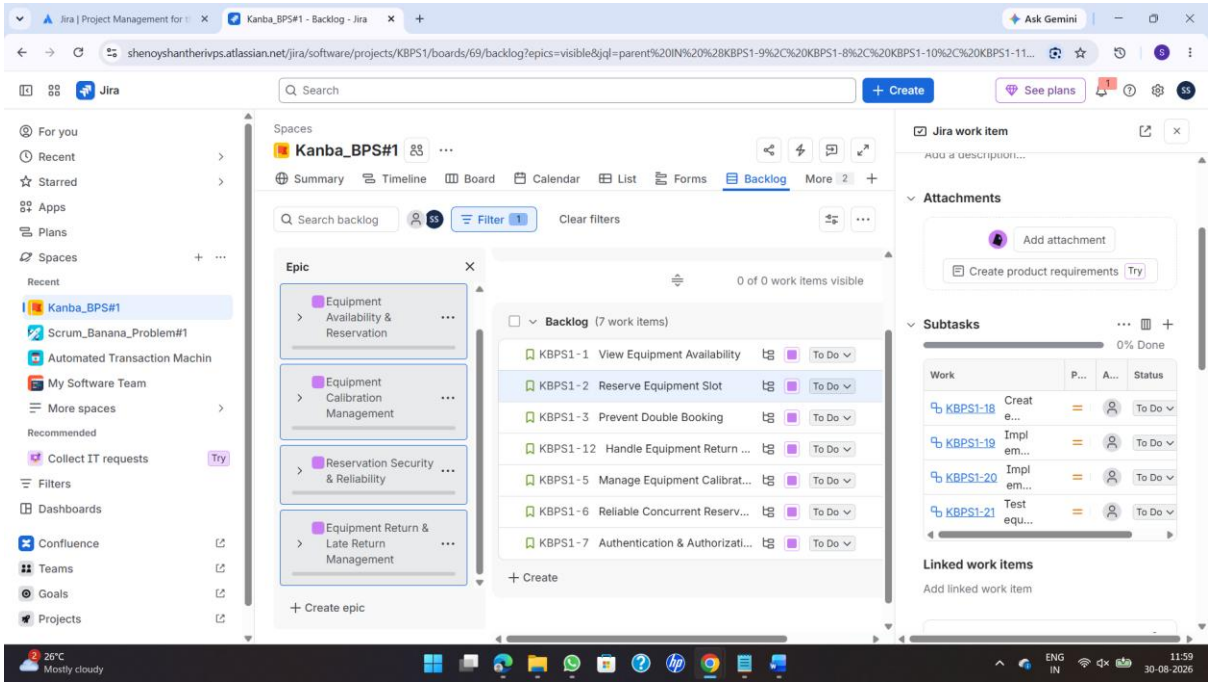

Screenshot 4 – Story and Subtask Details

Description:

This screenshot shows another Story selected from the Kanban backlog and its corresponding Subtasks. It demonstrates the hierarchical organization of work in Jira, where

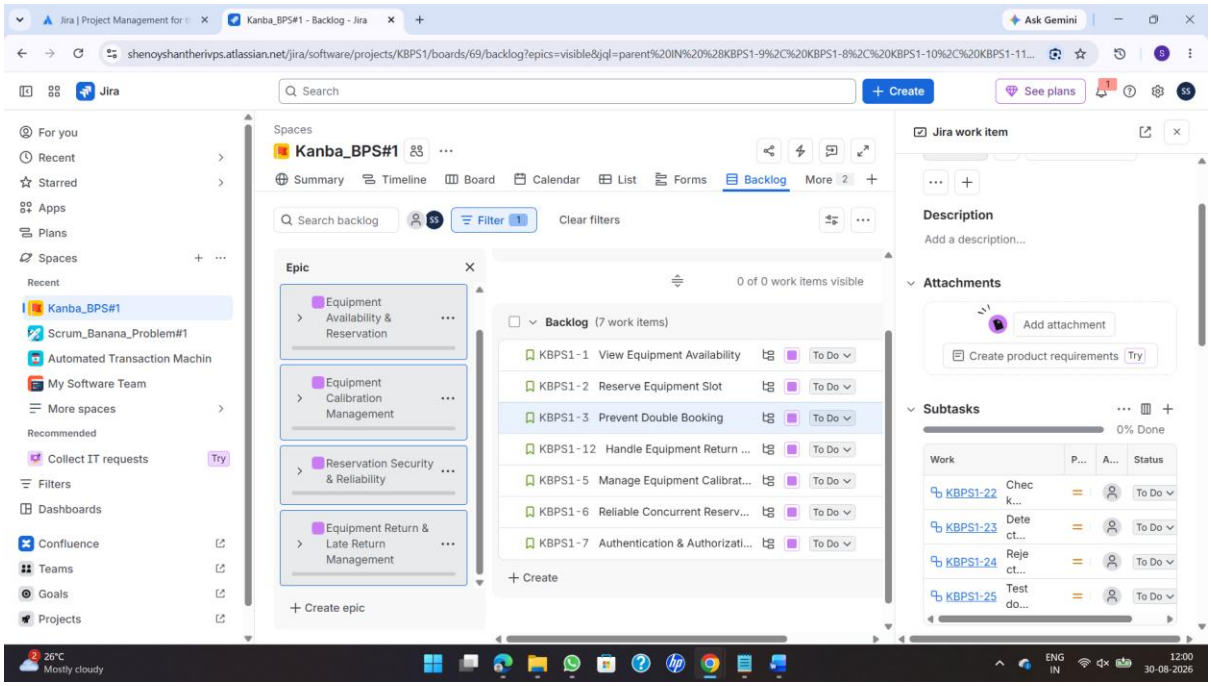

the Story represents a requirement and the Subtasks represent the individual activities required to complete it.

Screenshot 5 – Subtasks for Another Requirement

Description:

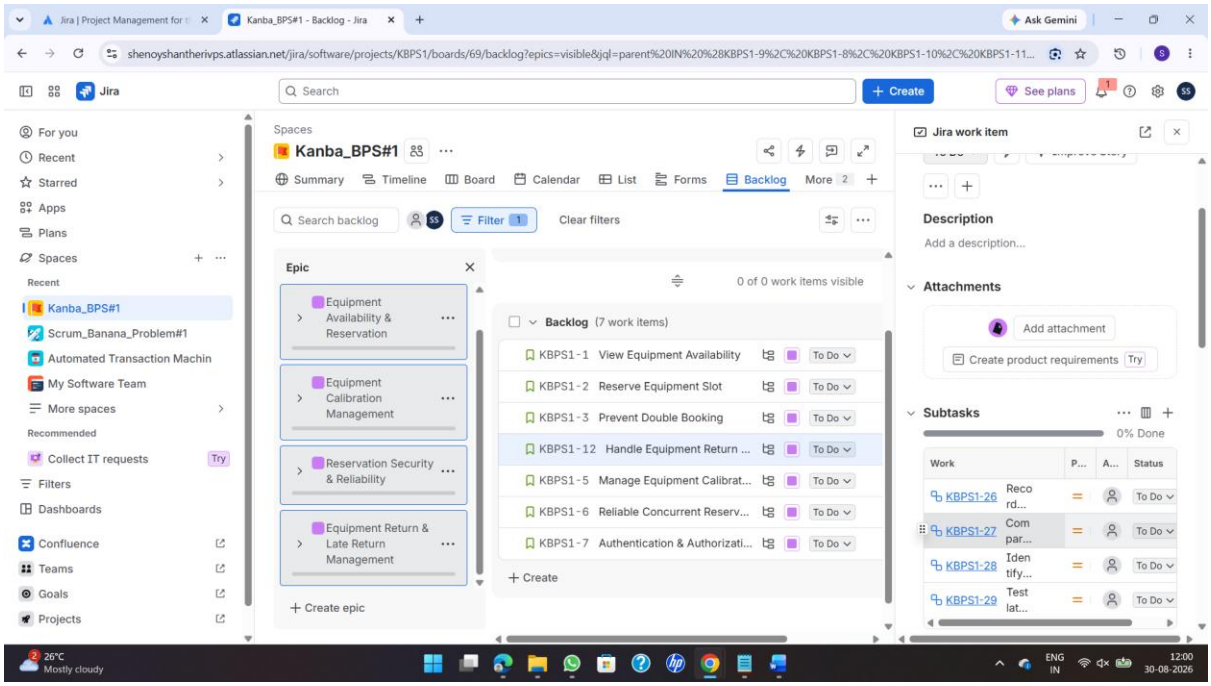

This screenshot shows the selected requirement and its associated Subtasks in Jira. The Subtasks provide a detailed breakdown of the work involved in implementing the requirement and help in tracking the progress of individual activities.

Screenshot 6 – Subtasks and Requirement Tracking

Description:

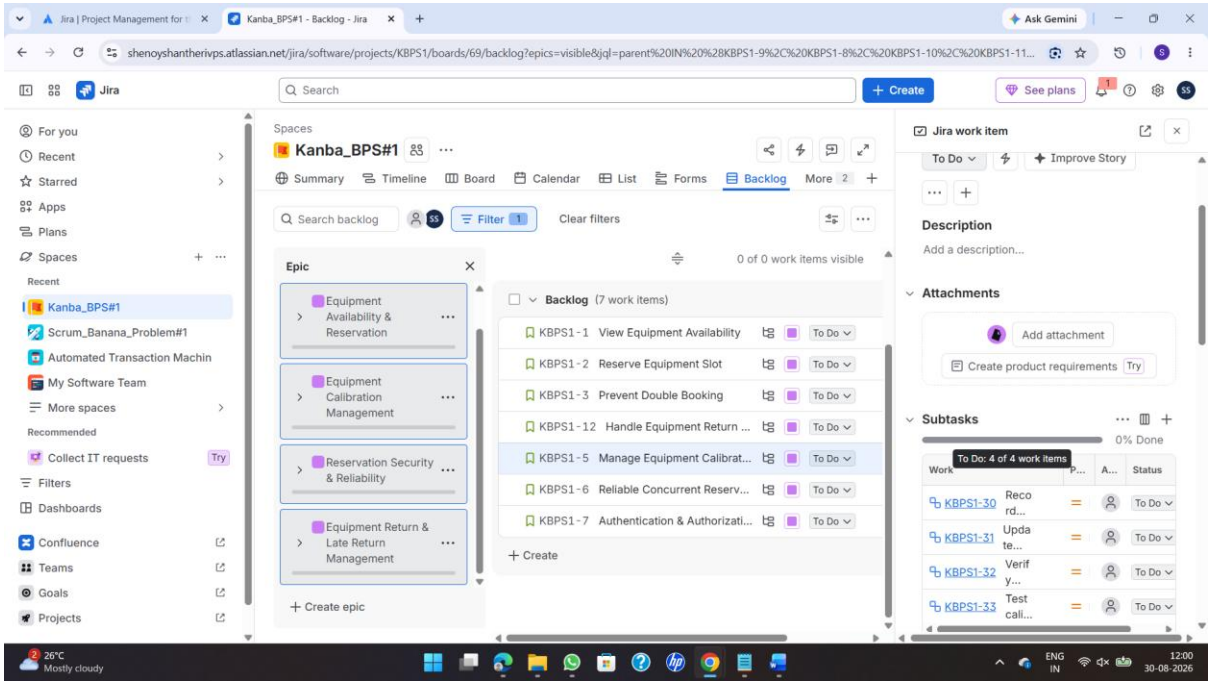

This screenshot shows another requirement in the Kanban backlog with its Subtasks displayed in the Jira work-item details panel. It demonstrates that the requirements have been further divided into smaller tasks for systematic implementation and tracking.

Screenshot 7 – Story and Subtask Details

Description:

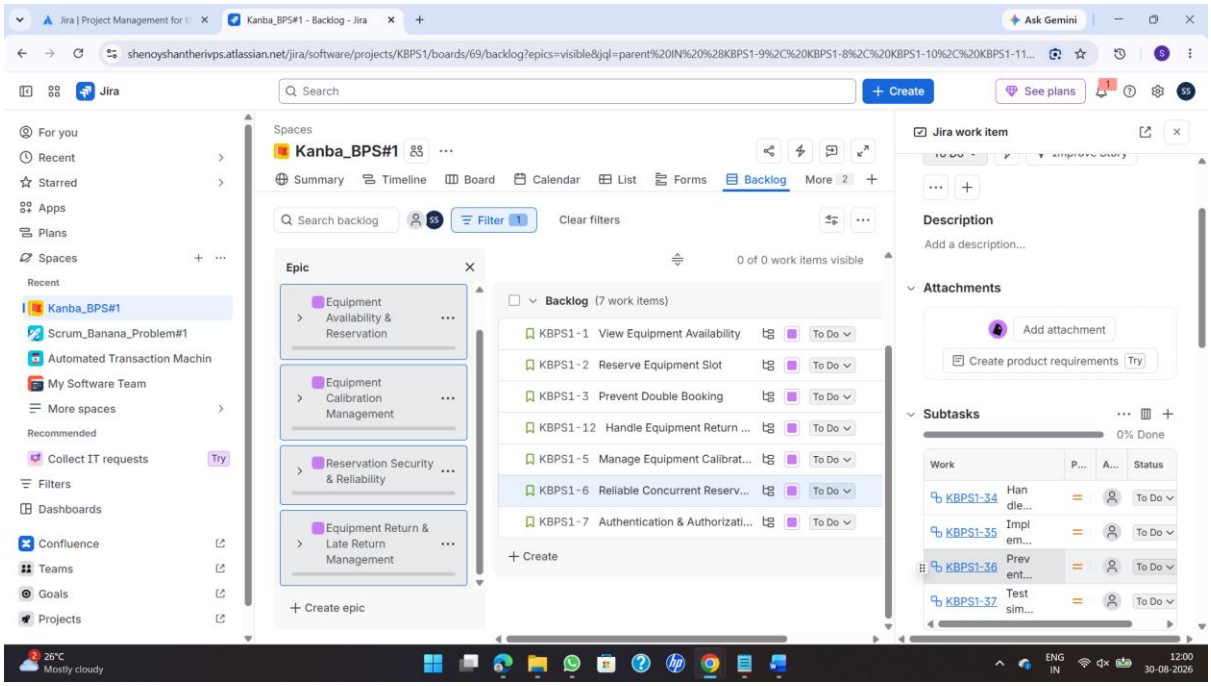

This screenshot shows another Story selected from the Kanban backlog and its corresponding Subtasks. It demonstrates the hierarchical organization of work in Jira, where the Story represents a requirement and the Subtasks represent the individual activities required to complete it.

Screenshot 8 – Story and Subtask Details

Description:

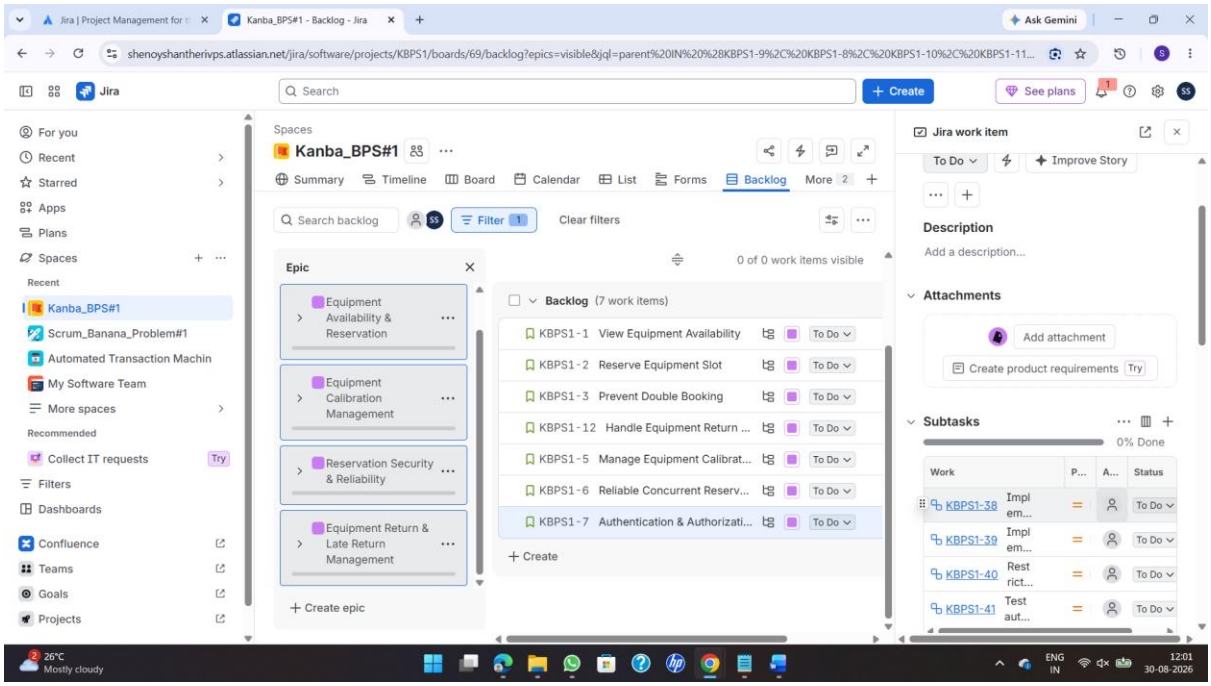

This screenshot shows another Story selected from the Kanban backlog and its corresponding Subtasks. It demonstrates the hierarchical organization of work in Jira, where the Story represents a requirement and the Subtasks represent the individual activities required to complete it.

Screenshot 9– Story and Subtask Details

Description:

This screenshot shows another Story selected from the Kanban backlog and its corresponding Subtasks. It demonstrates the hierarchical organization of work in Jira, where the Story represents a requirement and the Subtasks represent the individual activities required to complete it.

Screenshot 10 – Kanban Board with All Seven Requirements

Description:

This screenshot shows the Kanban Board containing all seven requirements of the Smart Lab Equipment & Slot Reservation Portal. The requirements are displayed as work items on the Board and are currently in the To Do status, allowing their progress to be tracked through the Kanban workflow.
